SPRINT PLANNING/PROGRESS UPDATE

MAY 23, 2025

Sprint – 5 was completed and the progress take a lot of time so our plan now is to carry over the pending tasks to sprint 6. Overall

SPRINT RETROSPECTIVE

MAY 23, 2025

What went well:

- Every single one of us collaborated with each other to achieve the common goal leading to a smooth workflow.

What could be improved:

- The team should improve prioritizing the project's development
- Make hastes with the development of the project

What needs to be done:

- As of the moment of writing, only two tasks were accomplished for this sprint and our group is aiming to carry over the tasks in the next sprint
- We should go and implement the backend portion of this project (api, database, etc)
- We must complete all the pending tasks in the next sprint in order to gain the lost momentum and also to lessen the time allocated.
