

## CURRENT PERCENTAGE OF COMPLETION

**SPRINT 4 = 100%**

**OVERALL PROJECT = 39.28%**

The screenshot shows a 'Project Tracker' interface with a table of tasks. The table has columns for Task name, Status, Assignee, Due date, and Priority. The tasks listed are Sprints 1 through 4, and various implementation tasks like 'Sign-up page Implementation', 'Email Verfication Page', 'Login page implementation', 'Forgot Password', 'Create/Preview/Edit/Delete Post Code Ir', 'Dashboard Code Implementation', and 'Home Page Implementation'. All tasks are marked as 'Done'.

Task name	Status	Assignee	Due date	Priority
Sprint 1	Done		04/21/2025 → 04/26/2025	High
Sprint 2	Done		04/21/2025 → 04/26/2025	High
Sprint 3	Done		04/21/2025 → 04/26/2025	Medium
Sprint 4	Done		05/12/2025 → 05/18/2025	High
Sign-up page Implementation	Done	James Michael M	05/12/2025 → 05/18/2025	High
Email Verfication Page	Done			
New sub-item				
Login page implementation	Done	Aleck Mcklaiyre A		
Forgot Password	Done			
New sub-item				
Create/Preview/Edit/Delete Post Code Ir	Done	Aleck Mcklaiyre A		
Dashboard Code Implementation	Done	Hannah Lorraine		
Home Page Implementation	Done	Mikka Esparagoz		
New sub-item				

## SPRINT PLANNING/PROGRESS UPDATE

**MAY 16, 2025**

Sprint – 4 this sprint, we pretty much integrated most of the UI/UX we designed using Figma.

Our group integrated most of the frontend stuff for this project

## SPRINT RETROSPECTIVE

**MAY 16, 2025**

What went well:

- Every single one of us collaborated with each other to achieve the common goal leading to a smooth workflow.
- All tasks were accomplished in a matter of time, leading to having no backlogs in future sprints

What could be improved:

- The team should improve prioritizing the project and avoiding procrastination

- Each one of us should improve the way how we write code, we should make it READABLE.

What needs to be done:

- As of the moment of writing, all tasks and stuff have been completed for Sprint-4 and was uploaded in our group's project repository.
- Start preparing for the next sprint and coding of the front-end (Improvement) and backend which we will start off
